# Designers

**Per Weiss** was born in 1959 in Denmark and is the Director of Innovation Design Office International. As an all-round creative person, he started his career as a professional musician, while already studying at the School of Architecture in Aarhus. Then giving a higher priority to his design visions, he worked for some of the famous Danish architects, Friis & Moltke and Schmidt, Hammer & Lassen. In 1988 he graduated as an industrial designer. Since 1989 Per Weiss has been the head of Innovation Design Office and responsible for concept, product design and marketing.

**Flemming Hoejfeldt** was born in 1950 in Denmark and is the owner and CEO of Innovation. The inventive and multi-skilled entrepreneur founded the company back in 1981, where he functioned successfully as designer, engineer and production manager in one. His first design was the Delta-bag, which in 2006 was re-launched as the Player beanbag. Today he has specialised staff, but as a truly autodidact person, Flemming Hoejfeldt still keeps an eye on every step of the process at Innovation, and is happy to take the challenge, whenever obstacles occur. He keeps his feet on the ground and yet never misses a good opportunity to develop design or business. Flemming Hoejfeldt is the driving power behind the worldwide expansion of Innovation as well as several good design ideas.

**Andreas Lund** was born in 1969 in Denmark. At Innovation he has contributed to the design process of the popular sofa beds Wing and Puzzle. He started his career as an organ builder before he studied at the Danish School of Design, where he graduated in 2000. Thanks to his talent, Andreas Lund has been rewarded with numerous design funds and prizes. With his own company, Format Design, he has created both furniture and product design for several Danish companies and participated in various exhibitions. Today he is moreover teaching at the Danish School of Design and the School of Architecture in Copenhagen.

**Marc Lebas** was born in France in 1965. As a publisher and designer of innovative objects, he is involved in the design of furniture, electronic items and, for more than 10 years, solar powered objects. He used to work with designer Olivier Peyricot (IDsland, 96) and Clementine Chambon (Lustre solar lulu 01, 2008). Iconoclast, he aims to simplify objects to give them more meaning and bring out their poetry.

Convinced that the conventional approach to design and manufacture objects must change, he founded in 2010 Litogami, Editor of sustainable development objects and creates the mini solarhouse « Casagami ».He collaborates with French engineers, developing objects using new photovoltaic technologies.w
